

2023 SUMMIT & PROGRAM UPDATE

SEPTEMBER 28 & 29, 2023

- Hyatt Regency
- 401 W. High Street, Lexington KY
- Accredited for 10.5 CME, CPE, CNE, other units

Thursday, September 28

8:30
Registration & Breakfast
Exhibits & Poster Hall

9:00
Welcome & Announcements
Nadeem Talpur, MD

9:15
Keynote: From Tragedy to Triumph: Unlocking the Secrets to Stroke Prevention through a Survivor's Lens
Christine Cosby-Gallagher, Ed.D

10:15
Break/Exhibits & Poster Hall

10:30
Falling in Love with the SPC Role
Misty Lewis, RN

11:30
Door to Needle Panel:
Enhancing Patient Outcomes
Shelly Zielke, BSN, RN

12:15
Lunch Buffet
Exhibits & Poster Hall

1:15
Concurrent Sessions:
Falling for Interactive Education (In-person attendees only)
• Escaping the Pitfalls of Stroke
• Changing Your Perceptions of Assessment
• Raking Up the Benefits of Gamification
1:30 Interactive Education
2:20 Break
2:35 Interactive Education
3:25 Break
3:40 Interactive Education

4:30
Closing Announcements
Break/Reception
Nadeem Talpur, MD

5:00 – 6:30
Update & Strategic Planning
Affiliate Awards
Networking Dinner

Friday, September 29

7:00
Registration & Breakfast
Exhibits & Poster Hall

7:45
Welcome & Announcements
Larry Goldstein, MD, FAAN, FANA, FAHA

8:00
Keynote: Post-Acute Stroke Care for Recovery and Prevention Need for a Learning Health System Approach
Pam Duncan, PhD, PT, FAPTA, FAHA

9:00
The Truth About Fibrinolytics
Emily Merritt-Lawless, MSPAS, PA-C

10:00
Break/Exhibits & Poster Hall

10:30
Changing the Stroke Landscape: Dual Role of Mechanical Thrombectomy and Thrombolytics
David Dombos III, MD
Jessica Lee, MD, FAAN, FANA, FAHA

12:00
Lunch Buffet
Exhibits & Poster Hall

1:00
Fall Fresh Coverdell Update
Lacy Shumway, BA

2:00
Stroke Mimics and Chameleons
Bryan Eckerle, MD, MSC

3:00 – 3:15
Closing Announcements
Evaluations/Adjournment
Larry Goldstein, MD, FAAN, FANA, FAHA

Stroke Care Network Web-Based Physician Education

Seven Stroke Learning Modules:

- The Diagnosis and Treatment of Acute Ischemic Stroke
- Recognizing Risk and Improving Stroke Care
- Emergency Surgical Interventions

New Printable Module:

- When is a Probable Stroke?
- Is This a Probable Stroke?
- This Would Be a Probable Stroke, Right?
- This is Definitely a Probable Stroke

DR. CHRISTINE COSBY-GAITHER

From Tragedy to Triumph: Unlocking the Secrets to Stroke Prevention through a Survivor's Lens

Christine Cosby-Gaither, Ed.D is a respected post-secondary educator, serial entrepreneur, stroke survivor, and the inspiring founder of A Stroke of Grace, a nonprofit organization serving black stroke survivors and their families.

Through navigating entrepreneurship and by supporting students on the campus of Simmons College of Kentucky (the nation's 107th Historically Black College and University), Dr. Cosby-Gaither has built an amazing career, (with a background in public relations), inspiring both organizations and students. In 2019, she experienced a life-changing stroke, which inspired her to help others who look like her to recover.

Dr. Cosby-Gaither's A Stroke of Grace organization helps black stroke survivors, and their families embrace their second chance at life.

Dr. Christine Cosby-Gaither is a source of hope and change in both her professional and personal life.

Dr. Cosby-Gaither is the author to *Overcoming Anxiety: A Practical Guide for Stroke Survivors* (Fall 2023) and is the wife to Langston. She is the mother of 2 girls, MaLay and Zuri. Her favorite past time activities are reading and traveling.

Co-Director, UK Neuroscience
Research Priority Area

PAM DUNCAN, PhD, PT, FAPTA, FAHA

Post-Acute Stroke Care for Recovery and Prevention Need for a Learning Health System Approach

Pamela W. Duncan, PhD, PT, FAPTA, FAHA is Adjunct Professor of Internal Medicine and Retired Professor (Department of Neurology). She received her BS degree in Physical Therapy from Columbia University and a PhD in Epidemiology from the University of North Carolina. Her previous academic affiliations were with Duke University, University of Kansas, and University Florida and the Department of Veterans Affairs. She was PI of the VA Rehabilitation Outcomes Research Center and was Co-PI of the University of Kansas Pepper Center. She joined the Wake Forest Faculty in 2011 to develop and evaluate innovative models of care to manage post-acute services for patients with medically and socially complex chronic conditions. She was the principle investigator of a PCORI funded large pragmatic trial to implement and evaluate an evidenced-based COMprehensive Post-Acute Stroke Services (COMPASS) model. This model of care combines CMS transitional care services provided by advanced practice providers (APP) and early supported discharge services coordinated by the APPs to develop with patients and families actionable care plans. Standardized assessments of the social and functional determinants of health are used to individualize care plans to manage blood pressure and stroke risk factors, manage medications, increase physical activity, reduce falls risk, optimize functional recovery, self-management of health and optimize access to primary care and community based services. The cluster-randomized trial included over 40 North Carolina Hospitals and over 10,000 patients.

The COMPASS transitional care intervention, supporting digital applications, and quality performance measures emerged from front line clinical practice at the Wake Forest Baptist Health Comprehensive Stroke Center. The evaluation of this intervention in a pragmatic trial continues to refine delivery of post-acute stroke care and will support scalability of our applications and models of post-acute care to other health systems.

In collaboration with Dr. Cheryl Bushnell, Dr. Duncan was instrumental in receiving multi-center, patient-randomized control trial. This award proposes to assess two interventions to lower blood pressure in the first six months following a stroke - one utilizes telehealth, individualized care planning, and behavioral health coaching to manage physical activity, medication management, and diet, and the other is in-person clinic management. Dr. Cheryl Bushnell is PI of this PCORI project, TEAMS BP.
