

The Stroke Care Network’s mission is to operate for the purpose of improving the quality of care, preventive medicine, education and research into stroke and related diseases throughout our region.

Core Values:

- Building and improving **Stroke Systems of Care**
- Promoting **organized, standardized stroke care** approaches in each facility and in components of the network
- Providing a value-oriented approach to education and awareness for the **communities**
- Providing a strong base in **clinical education**
- Promoting **Evidence-Based Standards of Care** by seeking effective **interaction and collaboration** among agencies, services, and people involved in providing prevention, identification, transportation, treatment, rehabilitation and community services of stroke patients
- Offering the latest proven therapies and **clinical trials**
- Identifying and implementing **quality management** measures for facilities, systems, and the network as a whole

Initial Affiliation:
